MCT 1302 Batch meets various needs in the weighing field: from simple management of level thresholds to complicated dosing procedures. The MCT 1302 Batch weighing solution is able to totalize the dosed weights divided by recipe and to store up to 100 different recipes with 20 steps. With an expandable memory, it can save up to 1000 recipes with 20 steps. The MCT 1302 Batch has a touch screen, an upload and download function for programming via TESTER 1008 and useful software for programming and saving recipes directly on the PC and transmitted via USB. MCT 1302 Batch has 6 logic inputs and 6 logic outputs and 4 optional Fieldbus: Profinet, Ethernet IP, Ethercat and Profibus. The MCT 1302 Batch dosing instrument can be customized according to customer needs.
